

Clark Forklift Parts

Clark Forklift Part - Performing globally, there are now 350,000 Clark forklifts and lift vehicles in operation, with more than 250,000 of those operating in North America. Clark has five major lines of lift trucks across the globe, making it one of the most expansive companies in the industry. Heavy duty trucks ranging from 1,500lb to 18,000lb capacities, dual fuel, petrol, LPG, hand powered lift trucks, narrow-aisle stackers and electric riders are a few of their specialties.

Clark Totalift, handles more than 120,000 particular components built for 20 exclusive designs of lift trucks and automated equipment. Your regional Clark Seller is your total source for availability of all your parts requirements provided by Clark Totalift.

Clark's extraordinary Parts Distribution Centers are conveniently situated in Louisville, Kentucky, which serves both their customers and sellers in North America, and Changwon, South Korea, which handles their Asian sellers and customers. For over 90 years, Clark has exceeded industry standards, being one of the most actively advancing manufacturers. Motivated to supply the highest level of value and service to our users, Clark remains on the leading edge when it comes to enhancing output and benefiting performance.

Worldwide, Clark has one of the most outstanding supplier support networks. With over 550 locations worldwide, seller representation in over 80 countries and 230 locations in North America, their high level of commitment to their customers predominates the material handling market.

Clark proudly remains an progressive leader of the material handling industry, revolutionizing safety features such as the worker restraint system. This exceptional commitment to safety is currently a customary feature on every forklift.

Clark's continual effort to have the No. 1 Quality system in the industry is proudly demonstrated by ISO 9001 - Clark, is the first lift truck producer across the globe to be certified with the internationally accepted quality standard ISO 9001 for each and every one of their production facilities. Additionally, the ISO 14001 Environmental Conservancy System certificate was awarded to Clark's Korean facility in 2001. This paramount achievement permits Clark to be ready for any number of environmental restrictions, thus placing them in a dominant market position.

Clark has selected the structure of "Lean Production" at all of its assembly facilities for the reason that this system is extremely economical and allows for minimal use of resources. Developed to ensure maximum efficiency, this system is intended to find and acknowledge the most effective methods for manufacturing facility management. Clark has concluded this transition of its Korean facility. COPS which is Clark Optimized Production System, similarly focuses on quality of product and services and production efficiencies.

By working collectively, Clark's product suppliers and engineers communicate towards improving product proficiency while minimizing expenses. The contemporary value engineering program combines modern product development and offers improved customer support and service within the industry.
